SUMMARY

Computer Science undergraduate at the University of Central Punjab (CGPA 3.58) aspiring to start a career as an AI Engineer. Hands-on experience building machine learning and computer vision applications in Python, including an SMS spam classifier (96.68% accuracy) using TF-IDF and Multinomial Naive Bayes, and a real-time drowsiness detection system using OpenCV, MediaPipe, and Streamlit. Strong foundation in data structures, algorithms, C++, and MySQL, with 6 projects on GitHub. Seeking an AI Engineer internship to build intelligent systems and grow in applied machine learning.

EDUCATION

University of Central Punjab, Lahore Oct 2024 – Oct 2028
- Bachelor of Science in Computer Science (BSCS)
- CGPA: 3.58

Punjab College, Lahore Jan 2022 – Mar 2024
- F.Sc. | Grade: 91.7%

PROJECTS

Spam Message Detector | Python, Scikit-learn, NLP, Machine Learning
- Built a machine learning application to classify SMS messages as spam or ham using the SMS Spam Collection dataset.
- Implemented TF-IDF vectorization and Multinomial Naive Bayes for text classification.
- Achieved 96.68% accuracy and enabled real-time prediction of custom messages.
- GitHub: https://github.com/MUHAMMAD-SHAVAIZ-JAMIL/Spam-Message-Detector

Sleep Detection System | Python, OpenCV, MediaPipe, Streamlit, Computer Vision
- Developed a real-time computer vision application to detect drowsiness through webcam-based eye monitoring.
- Used MediaPipe Face Mesh to extract facial landmarks and Eye Aspect Ratio (EAR) to identify prolonged eye closure.
- Built an interactive Streamlit dashboard to display detection results and integrated an automatic audio alarm to alert users when a sleeping state is detected.
- GitHub: https://github.com/MUHAMMAD-SHAVAIZ-JAMIL/Sleep-Detection-System

Nexus Grid Recommendation System | C++, Data Structures & Algorithms
- Built a smart city recommendation system with emergency dispatch, shortest-path navigation, inventory management, and citizen search.
- Implemented graph algorithms and data structures for efficient routing and information retrieval.
- GitHub: https://github.com/MUHAMMAD-SHAVAIZ-JAMIL/Nexus-Grid-Recommendation-System

Online Grocery Delivery System | MySQL, SQL
- Designed a relational database for customers, products, orders, payments, and deliveries.
- Wrote SQL queries to manage and retrieve business records.
- GitHub: https://github.com/MUHAMMAD-SHAVAIZ-JAMIL/Online-Grocery-Delivery-System

Hospital Management System | C++, OOP
- Developed a system to manage patient records, doctor information, appointments, and billing.
- Applied pointers, dynamic memory allocation, and file handling for data storage.
- GitHub: https://github.com/MUHAMMAD-SHAVAIZ-JAMIL/Hospital-Management-System

Bank Management System | C++
- Built a console banking application supporting accounts, deposits, withdrawals, and balance inquiries.
- Implemented file handling for persistent record storage.
- GitHub: https://github.com/MUHAMMAD-SHAVAIZ-JAMIL/Bank-Management-System

SKILLS

- **Programming Languages:** Python, C++, SQL
- **AI / Machine Learning:** Machine Learning, Natural Language Processing (NLP), Computer Vision, Prompt Engineering, Scikit-learn, OpenCV, MediaPipe, TF-IDF, Naive Bayes
- **Databases:** MySQL
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming
- **Tools:** Git, GitHub, Streamlit, Visual Studio Code, Visual Studio, EMU8086
- **Interpersonal:** Communication, Teamwork, Leadership, Responsibility, Creativity
